

SpaceX Mars Mission Updates

Latest Headlines

1. **Starship Mars launch timeline:** But a Starship Mars launch is not going to happen in 2026. Then they have to build a Mars-specific version with landing legs.
 2. **Elon Musk's update:** SpaceX founder Elon Musk delivers an update on the company's plans to go to Mars at Starbase in Texas. Musk says that despite Starship setbacks, the space company hasn't taken its eyes off the ball — and that ball is big, red, and roughly 140 million miles away. Musk has a reputation for underestimating schedules but has presented another ambitious timeline. SpaceX is looking at several potential areas on Mars where Starship could land, with Arcadia as the lead candidate.
 3. **Multiplanetary mission:** SpaceX (@SpaceX). The Road to Making Life Multiplanetary: an update from @elonmusk on SpaceX's plan to reach Mars.
